# JD Edwards Services Span

# Our Proprietary Tools and Accelerators

## iLink<sup>SM</sup>

Pre-built adapter to provide synchronization of master data between Cloud products (PDH, CPQ) and JD Edwards E920

## ProDart<sup>SM</sup>

ProDart provides functionality to compare and document Processing Option and Data Selection values across instances or environments on the same instance

## \*ProVue<sup>SM</sup>

Specialised E1 application monitoring solution. Built for E1, but with customizability and flexibility to suit your environment

## AutoSet<sup>SM</sup>

Pre-defined Excel templates with import and export functionality, Master Data, Opening Balances and Open Orders programs

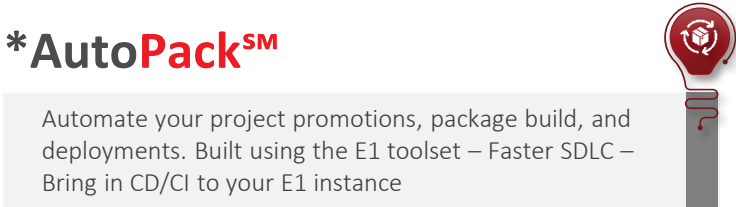

## MineJDE<sup>SM</sup>

A process mining offering to provide data base insight of customer business process and helps in identify and prioritize areas of improvement

Automation First

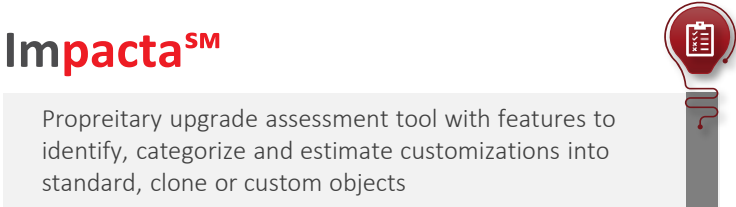

Smarter Services

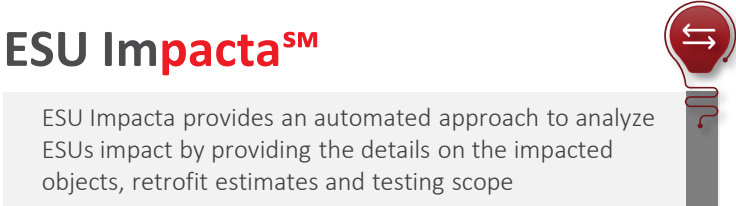

## \*AutoPack<sup>SM</sup>

Automate your project promotions, package build, and deployments. Built using the E1 toolset – Faster SDLC – Bring in CD/CI to your E1 instance

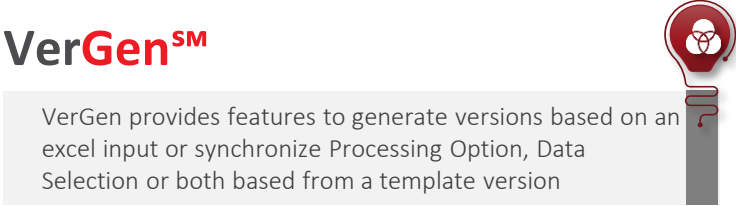

## Impacta<sup>SM</sup>

Propreitary upgrade assessment tool with features to identify, categorize and estimate customizations into standard, clone or custom objects

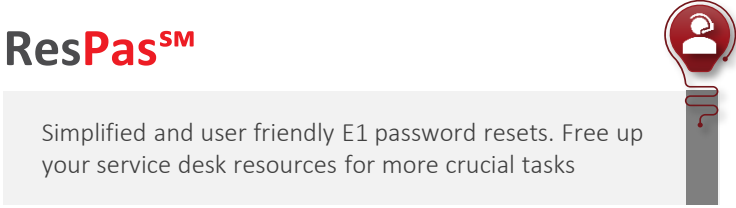

## ESU Impacta<sup>SM</sup>

ESU Impacta provides an automated approach to analyze ESUs impact by providing the details on the impacted objects, retrofit estimates and testing scope

## VerGen<sup>SM</sup>

VerGen provides features to generate versions based on an excel input or synchronize Processing Option, Data Selection or both based from a template version

## ResPas<sup>SM</sup>

Simplified and user friendly E1 password resets. Free up your service desk resources for more crucial tasks
