

The Bitmovin Streams Solution

Our Streams solution brings users an all-in-one solution that is simple to use and delivers the highest quality. Whether you are new to video streaming and need an intuitive platform to get started or you are an experienced developer with deep technical knowledge, the Bitmovin Streams platform allows you to get started quickly and simplify your workflow.

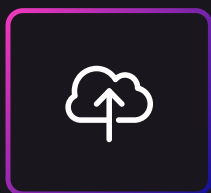

Key features:

- ✓ Three easy steps starting with direct upload into the platform
- ✓ The Streams platform encodes the video(s)
- ✓ Instant Processing

Benefits:

- ✓ **Speed:** Your embed codes will be ready to use immediately
- ✓ **Insights:** with access to our Analytics tool, you receive immediate insights to make better decisions
- ✓ **Easy to Use Workflow:** a no-code experience that makes life easier

How it works

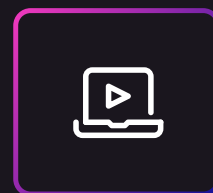

Create a Stream

Simply upload your content onto the platform to generate your VOD output. Support for Live Encoding is coming soon.

Embed it anywhere

Embed your video content with just a few clicks and deploy instantly.

Monitor

Get immediate insights and make improvements using our Analytics tools.
