connectpoint

About the Company

ConnectPoint offers IT solutions in the area of advanced data analytics for the industry, energy and utilities sectors. It specialises in IT/OT integration, i.e. managing the entire process of collecting, organising and analysing operational data. It builds systems that enable effective cooperation of Operational, IT and Business departments.

The company has offices in Poland - in Warsaw, Częstochowa and Opole and in Germany - in Dusseldorf. It employs nearly 100 highly specialised consultants.

Our Data Science Team

The Data Science team deals with the acquisition, processing, analysis of data, and above all, withdrawing conclusions from it and predicting the future. We have many years of experience in building solutions for clients and supporting the development of our products.
Our competencies include anomaly detection, data visualisation, and machine learning. We operate in on-premises and cloud environments (Azure).

Our Business Intelligence Team

The BI team deals with analysis, design, implementation, and maintenance of database systems, Big Data/Data Lake platforms for the industry and energy sector.

Our competences include i.a. traditional data warehouses based on the relational model and data lake repositories with their ETL/ELT supply processes, OLAP systems, and reporting systems. We operate in both on-premises and cloud environments (mainly Azure).
