

NetApp: Backup into the cloud

Case study

International company involved in the distribution of cosmetics, perfumery and luxury products.

Our Offer

Infrastructure Azure

OBJECTIVES / NEEDS

This customer currently has a NetApp array

Three challenges:

- Securing their NetApp infrastructure
- Setting up a DRP
- Hybridize with the cloud for greater simplicity.

TACTICS

Setting up hybridization with AZURE

Setting up replication between NetApp and AZURE.

RESULTS

Provisioning of a "PRA" service that secures the infrastructure and allows for service continuity

Back up of On Premise solutions in Azure

Data is permanently replicated in the cloud
