

Grafana Cloud

You already know Grafana, get to know Grafana Cloud.

A highly available, fast, fully managed OpenSaaS logging & metrics platform.

Super Fast Prometheus and Graphite Compatible Backend

Grafana Cloud includes your own dedicated Grafana instance along with a high performance metrics backend, fully compatible with Graphite and Prometheus. Choose either... or both!

Import your historical data and unify all your metrics seamlessly within Grafana.

Truly Unify your Data

Grafana Cloud is unlike any other SaaS platform. Get access to a growing list of plugins and integrations to visualize your data from over 40 different datasources and 3rd party vendors. Each of these plugins can be installed with one click.

Tightly integrated log aggregation and storage with Loki

Explore all your logs from within Grafana, with the ability to quickly and easily switch between metrics and logs.

Powerful Alerting

Seamlessly define alerts where it makes sense — while you're in the data. Define thresholds visually, and get notified via Slack, PagerDuty, and more.

Come for the performance. Stay for the integrations.

Does all your data live in one place? Didn't think so. We have a growing collection of 3rd party integrations so you can keep using the services and processes you have in place. Get the ultimate flexibility so you can visualize your data no matter where it lives and break down those silos.

Frequently asked questions?

Why should I pay for Grafana Cloud?

Grafana Cloud is all about delivering a mission-critical, fully managed Grafana stack to your organization. Leverage our expertise in managing and scaling Grafana so you can focus on your business, not managing your monitoring stack.

Do you offer a free trial?

Yes! Get started risk-free with a 30-day trial of Grafana Cloud. You'll get complete access to all features of our Standard plan, including Hosted Metrics, Logs and more.
