DnA Accelerator for Financial Services

Put customers at the center of your firm and improve operational efficiency- with data you can trust.

Financial institutions are facing increased challenges as customers demand for more seamless, digital experiences. How can you leverage your firm's data to remain competitive and efficient?

Data and AI are driving the future of the financial services industry. With HSO's **DnA Accelerator for Financial Services**, you can transform your firm into a modern, secure, data-driven powerhouse that puts your customers first.

Our **DnA Accelerator** helps overcome data challenges by providing a unified platform for seamless data integration and comprehensive analytics capabilities - empowering you to unlock valuable insights and drive data-informed decisions.

Scale and Flexibility
Scale and flexibility for enterprise-wide dashboard initiatives most traditional data warehouses don't offer

Faster Implementation
Expedites the solution development process and achieve timely results by eliminating the need to build a solution from scratch

Consistency & Efficiency
A consistent framework that enables standardized processes, reduced errors, and improved overall quality in solution development

Scalability & Adaptability
Manages data solutions of different scopes and complexities, providing guidelines for data requirements, facilitating scalability and adaptability to specific needs

Tighter Collaboration
A unified data and insights platform with a single source of truth. providing a common framework teams can use to work together effectively

At the core of this accelerator lie best practices and native cloud services, ensuring exceptional scalability and unparalleled performance. Leveraging the latest **Azure Data & AI** tools, including **Microsoft Fabric** and **Copilot for Power BI**, you can watch your data transform into intelligence with ease.

HSO + Microsoft Cloud for Financial Services

Quality data is the foundation for informed decision-making, operational excellence, and maintaining trust in the financial services industry. It is the first step in the journey to autonomous finance and imperative for successful AI adoption. With HSO's extensive industry and Microsoft Azure capabilities, you can extend the power of Microsoft Cloud for Financial Services with our DnA Accelerator to transform customer experiences and improve operational efficiency.

How Data and AI are driving the future of Financial Services and Autonomous Finance

Why a Large Mutual Insurance Company chose HSO's DnA Accelerator for a Multi-Phase Data Analytics Engagement

Leveraging Microsoft Azure and Fabric, HSO's DnA Accelerator was able to automate the client's data ingestion from various platforms into a centralized repository. The data was then consolidated and transformed into a new financial data model for reporting and analytics workloads.

HSO's deeply experienced data and analytics team was able to grasp and demonstrate a full understanding of the issues and goals and offered a strong solution. The team laid out a clear, step-by-step plan that not only addressed the client needs, but provided a new structure for budgetary considerations.

"Instead of giving us what we wanted, you gave us what we needed."

- CMO, Large Mutual Insurance Firm

Firms will benefit from improved:

- Financial Planning
- Revenue and Profitability
- Asset Quality
- Risk Management
- Customer Relationships
- Operational Efficiency
- Productivity
- Regulatory Requirements
- Market Forecasting
- Portfolio Performance
- Fraud and Security Measures
