

IntelliDocX

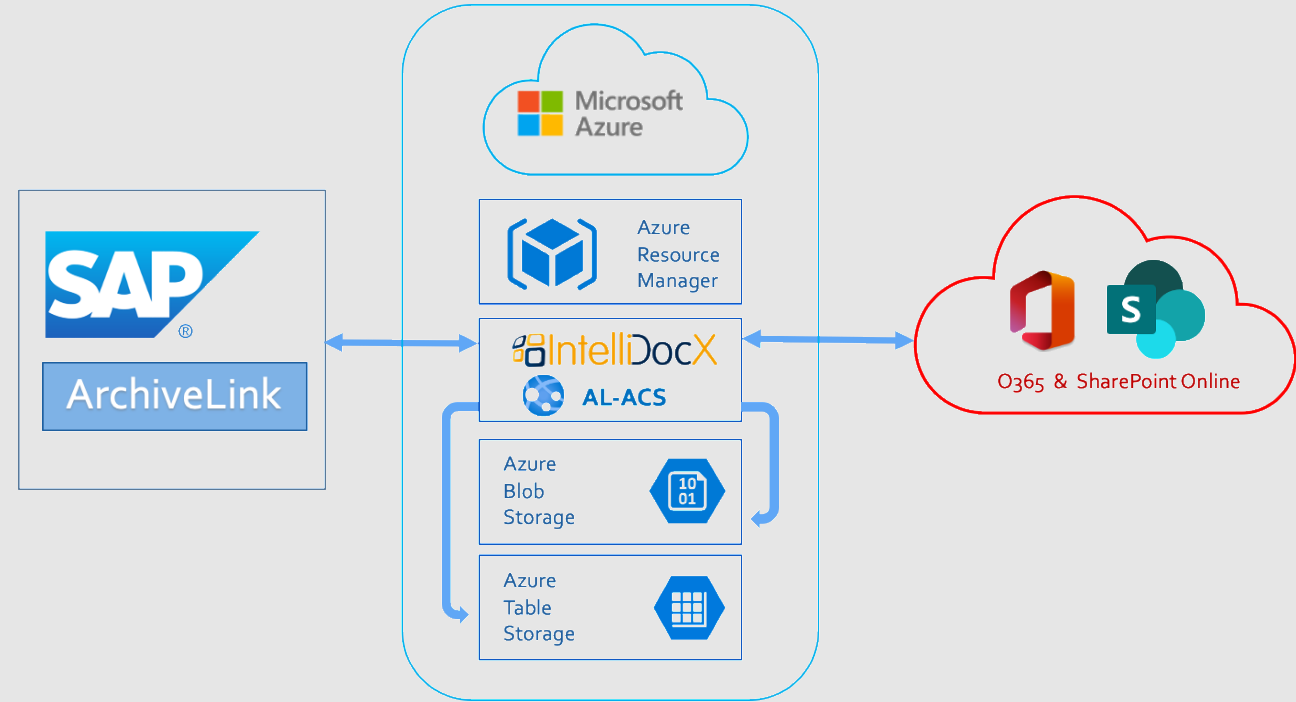

AL-ACS: Azure Content
Services for SAP® ECC &
S/4 HANA®

www.intellidocxemea.com

Use Azure to store SAP Content and enable Microsoft users for SAP processes

Use Microsoft Azure® for SAP® ArchiveLink ECM, plus leverage Azure to optimize your document processing workstreams and extend SAP content-centric processes to Azure, Power App/Teams and O365 users.

CHALLENGES

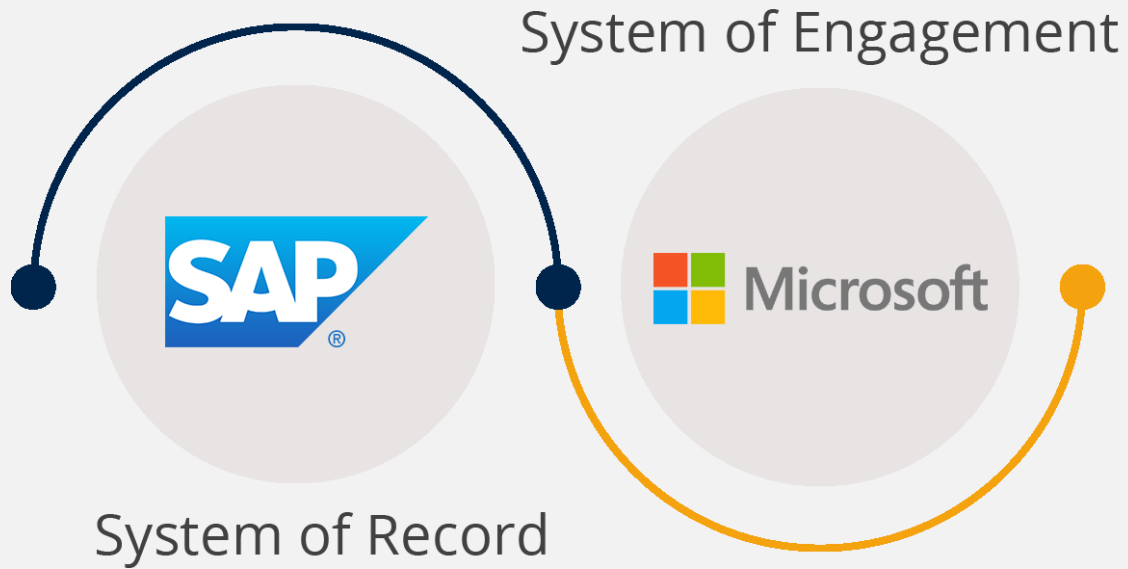

- Upgrade current SAP to S4/Hana
- Move SAP from On-premises to Cloud
- Migrate large content server archives
- Dismiss legacy ECM
- Implement Digital Workplace in the Enterprise

IDEAL SOLUTION

Our meta data driven approach to Content Services for SAP allows enterprises to leverage Microsoft Azure assets to manage SAP content plus automate supporting structured and unstructured process activities.

DESIRED OUTCOMES

- Reduce Content Storage Costs
- SAP ECM becomes Azure cloud enabled
- Inside SAP, documents are one click away
- SAP & Azure Users work with same content
- Both their SAP and ECM Azure hosted together
- Power, Security & Reach of Azure Cloud

IntelliDocX

AL-ACS

AL-ACS addresses the requirements of SAP customers desiring to not only store SAP business content in the cloud, but also intelligently provision content so SAP processes are instantly and fully content enabled. Our approach to Content Services for SAP allows enterprises to leverage Microsoft Azure assets to manage SAP content plus automate supporting structured and unstructured process activities.

INTELLIGENT CONTENT MANAGEMENT

More efficient document processing

NATIVE AZURE SERVICES FOR SAP ECM

Azure Web App; Use Azure Blob or SharePoint Online content storage

FULL SAP-MICROSOFT INTEROPERABILITY

Configure your own own Azure service plan; be running in less than an hour

IntelliDocX AL-ACS enables Microsoft applications access to SAP content and data

Go beyond just ECM: automate Content Processes

- Ready to Use API Services for Apps and Users external to SAP
- Advanced Search for both SAP and O365 users, remote attaching of documents to SAP records, distributed workflow activities and Azure based Ingestion, Capture and OCR services, along with transactional data read/write/update to SAP.
- Teams, O365 & Power Apps. ACS API services work with Power BI, Virtual Agents, Automate, AI and robotic process automations.

IntelliDocx and Office365

Store documents and metadata to SharePoint content libraries

IntelliDocx and TEAMS

Build Teams Channel organized by SAP Business modules. Use natural language ChatBot to interact with SAP transactions.

IntelliDocx and PowerApps

Build PowerApps that engage SAP Processes

IntelliDocx and PowerBI

Create PowerApps dashboards to represent aggregate data from SAP transactions.

IntelliDocx and Power Automate

Connect SAP data sources and create SAP-enabled workflows.

Customer success: Trinseo implements IntelliDocX and Microsoft Azure for SAP as part of its SAP “Lift & Shift” Upgrade

“IntelliDocX allowed us to easily update and cloud-enable our SAP ECM at the same time we shifted our SAP environment to Microsoft Azure”

Trinseo Director for Enterprise Applications

Azure Cloud Upgrade for their SAP

As they shifted their On-Premise SAP ERP system to the Azure cloud, they also looked to implement a new capability for SAP ECM by using Azure for their SAP content management in support of Finance and Purchasing business areas

With IntelliDocX, Used Azure for SAP ECM also

With IntelliDocX, content that had been held in a legacy Documentum system was migrated to Azure SharePoint-Online, and using IntelliDocX their new Azure-hosted SAP ERP was set-up to automatically store and recall all documents in Azure

Business Benefit

Replace On-Prem Legacy ECM with the scalability, reliability & strength of Azure
More responsive and simplified Cloud Infrastructure
Reduce operational and maintenance costs for SAP ECM by 75%

Channel partner success: CumulusPro extended IntelliDocX Content Platform to automate SAP Invoice Processing for Equinox Gold

“REALLY BIG THANKS to everybody for your support and collaboration to make this project a success!! Next, we would like to see how you can help us continue using Azure for streamlining business processes, increase users’ productivity (reduce repetitive tasks), workflows, and data master management in SAP” - VP Technology

Azure Hosted Document Processing

CumulusPro’s Azure hosted BPM system automated the ingestion, imaging and data capture of inbound vendor invoices and their flow to the IntelliDocX Content Platform for subsequent storage in Azure SharePoint On-Line

IntelliDocX linked CumulusPro to SAP A/P

IntelliDocX allowed in-side SAP users to benefit from automated SAP A/P workflows, and giving them single click access to all vendor documents held in Azure; out-side SAP users handle invoice coding and approvals right from O365

Total ROI in 4 Months

Using Azure, IntelliDocX and CumulusPro to automate their SAP A/P Process and manage vendor invoice documents, allowed Equinox to reduce the processing cost of an invoice from \$21 each to \$7. With 20,000 invoices per year, the system paid for itself in 4 months!
