

Offer your employees a modern work experience with Invenate's Azure Virtual Desktop solution.

What is Azure Virtual Desktop (AVD)?

"Access your desktop and applications from anywhere", is the short and concise summary for AVD. AVD is ready to use in minutes and enables secure remote working in the familiar Windows 10 environment.

System administrators can quickly provision and manage desktops, apps, and Windows servers in Azure. This can save costs and reuse existing licenses. Complete management and deployment of AVD can be done through the Azure portal.

With AVD, your organization can seamlessly scale your virtualization needs while benefiting from Azure's rich security features. Replace your existing VDI environment and make your IT specialists' job easier. So they can focus on the important issues in your business.

The complete overhead of a VDI environment is taken over by Microsoft as a free service. The hosting of the server, storage and network infrastructure, as well as the maintenance of these. Even the switching of users to the right clients and the complete licensing are included in AVD.

This eliminates the tedious management of the classic VDI environment and your IT team can concentrate on more important issues with the available resources.

More security, more cloud, more flexibility for your business with Invenate's Azure Virtual Desktop solution.

What are the benefits of AVD?

Reduced costs

Reduce costs by optimally sizing VM size, using Azure Hybrid, or booking reserved instances.

Improved flexibility

Provide your employees with a simplified office IT infrastructure deployment where end users can access their desktop from multiple devices and browsers.

Integrated smart security

Use the well-known security features of Azure, such as multi-factor authentication, single sign-on or conditional access for your AVD environment.

Reduced support times and rapid scaling

Automatic adjustment of the required computing power through short-term provisioning for time-critical requirements.

Full integration into the M365 environment

Take your virtual desktop environment to the next level by making the full M365 world optimally available to your users.

Prerequisites for using AVD

- Microsoft 365 F3, E3, E5, A3, A5, Business Premium
- Windows 10 Enterprise E3, E5
- Windows 10 Education A3, A5
- Windows 10 VDA per User

What do we offer?

Invenate 1 Day AVD Package

- Kick-Off Workshop
- AVD Fundamentals
- Analysis of the existing infrastructure
- Design of a landing zone
- Cost calculation in the Azure price calculator

1500,- €

Invenate 5 Day AVD Package

- Invenate 1 Day AVD Paket +
- Preparation of the landing zone
- Setup of the Landing Zone
- Establishing the conditions of the clients
- Implementation of AVD pilot deployment
- Monitoring the pilot deployment
- Handover to operations
- Documentation

7000,- €
