Set the right goals for a successful cloud adoption

We often face companies that are not satisfied with their cloud adoption projects, usually because they couldn't set clear goals for the project or onboard their business decision-makers in the planning phase. A good Azure adoption strategy starts with following the Microsoft Cloud Adoption guidelines. Involving BDMs from the beginning, forming new technical skills, and counting on a trusted partner with solid expertise derived from the field are vital aspects you should take care of.

CHALLENGES

A bad Cloud Adoption project can lead to an unsatisfactory experience, that can end with undesired costs.
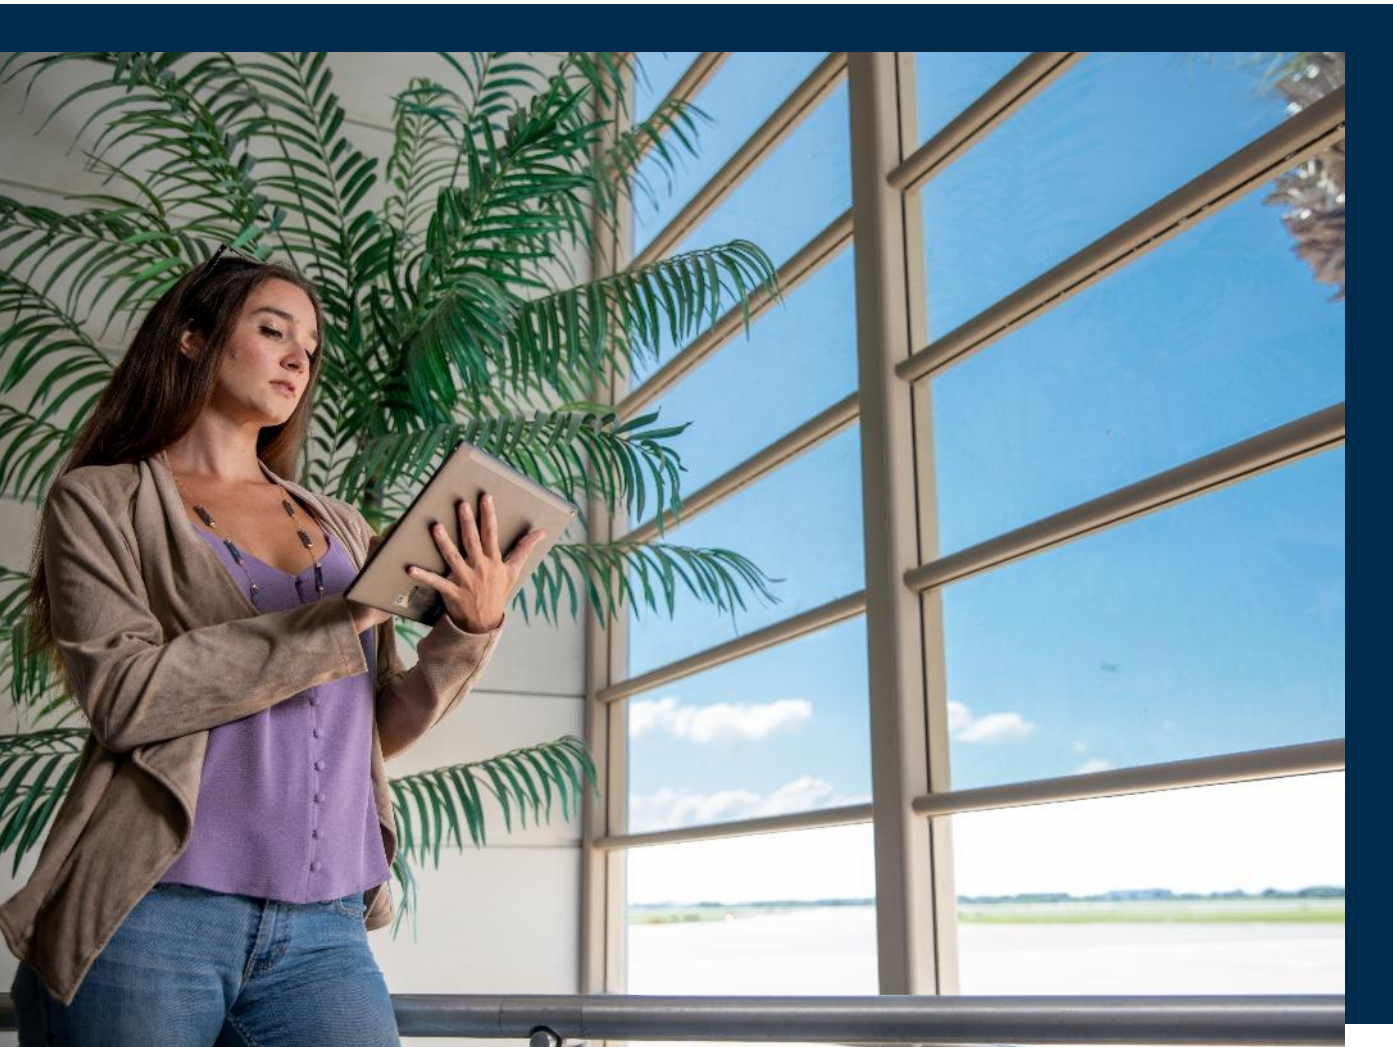

IDEAL SOLUTION

A trusted partner with solid skills in adoption and migration projects can quickly drive you in the right direction, onboarding all the required teams and setting the right expectations. Then, it can translate the decisions taken with you into a scalable, secure, and affordable Azure architecture that satisfies your business needs.

DESIRED OUTCOMES

Our Azure Advisory service will help you make the right decisions through interactive workshops and set the right KPIs to define a successful outcome for the project. Once your needs and expectations are clear, we design and implement an Azure architecture that can support them.

Cloud Journey Starter Pack

The lessons learned from the field and our solid Azure skills forged our Azure Advisory service. We want to be your trusted Azure advisor: let us copilot your cloud journey in the right direction.

1 INTERACTIVE WORKSHOPS

Be involved in all the key decisions. Help us to focus on your business needs.

2 DESIGN THE RIGHT BLUEPRINT

Translate your business needs into a solid, secure and scalable Azure architecture derived from the Cloud Adoption Framework best practices.

3 LET'S MAKE IT REAL

Implement the initial Azure landing zone to hosts your first workloads through an Infrastructure as Code approach.

SoftJam Cloud Journey Starter Pack & Microsoft Azure
