Azure Cloud Migration by Anunta:
7-Days FREE Assessment & Strategy

Azure Cloud Migration by Anunta - Assessment, Strategy, and Deployment

Move workloads including end user data, enterprise applications, and business processes to a cloud environment.

CHALLENGES

- More than 90 percent of businesses already use cloud, which offers unparalleled scalability and cost efficiency, for at least some of their workloads.
- Yet moving data and applications smoothly from on-prem into the cloud remains a major challenge.
- Although public cloud platforms offer the same core types of resources such as VMs, data storage, firewalls and identity management services as companies typically deploy on-premises, moving workloads into the cloud is rarely a lift and shift affair.

IDEAL SOLUTION

- Augments your data center migration strategy by focusing on a fast and cost-effective approach
- Migration to have minimal impact on your employees and customers and your services remain seamless.

DESIRED OUTCOMES

- Move away from capex to opex model by optimizing cost.
- Scale up or down VMs within minutes as per business needs.
- Achieve the operational consistency by setting up a VM within minutes.
- Adoption of modern applications allow teams to increase speed by upto 33%.
- Minimize teething issues.
- Low cost Disaster Recovery

Anunta will assess the IT landscape to analyze the requirements in terms of security, capacity, and networking to create the most effective migration roadmap. Based on this roadmap, the most suitable cloud resources are identified and an action plan for deployment is designed to minimize downtime and improve end user experience.

Anunta will then design and implement an Azure environment that addresses the custom requirements and take complete ownership of the entire process, including its management.

Anunta, a Gold Microsoft Partner who holds Microsoft AVD Advanced Specialization, has strong domain experience, extensive technology proficiency, and proven success in implementation, optimization, and management of virtual desktop infrastructure on Azure in delivering multiple projects on Cloud Migration on Azure, AVS.

BENEFITS

- Increase operational efficiency by setting up a VM within minutes.
- Optimize cost by moving away from capex to opex model.
- Scale VMs up or down according to business needs with ease.
- Increase speed up by 33% with the adoption of modern applications.
- Accelerate the digital transformation journey with cloud technologies.

Azure Cloud Migration by Anunta: 7-Days FREE Assessment & Strategy

Assessment Parameters	Application Servers
Assessment and planning (7-Days)	
Identify a use-case	Yes
Define success matrix	Yes
Discovery of resources for migration	Yes
Prerequisite checklist readiness and setting up Azure Migrate environment	Yes
Configure network connectivity	VPN

Trusted Managed DaaS

Overview

Global managed Desktop as a Service (DaaS) provider

10+ years in VDI design, implementation and management

Proprietary IP across the spectrum of our offerings

Advanced automation with high-quality & scalable, remote delivery structure

Products

Enterprise DaaS for large enterprises

Packaged DaaS for SMBs

Digital Workspace

Cloud Transformation

Market Leader

500,000+ Remote Desktop Users Served

Featured in **VMware Partner Executive Edge**

Featured in **Gartner peer insights**

Featured in **Market Guide for Desktop as a Service 2021 and 2019**

Technology Partners

Delivery Excellence

200,000+ User Desktops under Active Management

1,000+ Applications Assessed and Integrated

74 Net Satisfaction Score

99.98% Application Availability

<0.3 Lowest Incident to User Ratio
